

What happens to my rubbish?

When you send your rubbish to TerraCycle it's transformed into a valuable resource. Here's how we ensure your waste gets a new life.

The rubbish arrives at our warehouse where it is weighed, sorted and mixed with similar items.

It is then sent to processing facilities to be recycled into raw materials.

These raw materials are used to make products like benches, plant pots, compost bins and even playground equipment.

Find out more about how we're eliminating the idea of waste here [terracycle.com/en-GB/terracycle-difference](https://www.terracycle.com/en-GB/terracycle-difference)
